Students of Jayamukhi College of Pharmacy creating awareness about CPR

Cardiopulmonary Resuscitation (CPR) is an emergency procedure that combines chest compressions often with artificial ventilation in an effort to manually preserve intact brain function until further measures are taken to restore spontaneous blood circulation and breathing in a person who is in cardiac arrest. It is recommended in those who are unresponsive with no breathing or abnormal breathing; CPR involves chest compressions for adults between 5 cm (2.0 in) and 6 cm (2.4 in) deep and at a rate of at least 100 to 120 per minute. The rescuer may also provide artificial ventilation by either exhaling air into the subject's mouth or nose (mouth-to-mouth resuscitation) or using a device that pushes air into the subject's lungs. With the kind help of Srinivasa Heart foundation, we could get 2 mannequins by which we could make a practice with school staff and children. Jcphas organized awareness program on CPR to the students and staff of papayapeta Zphs School.

Jayamukhi College of pharmacy creating awareness on women health to school students

"Lack of toilets and unawareness about menstrual hygiene has an adverse impact on women's health. What we aspire to do is change the mindset of people about menstruation. The initiative, stemmed from the need to make women in Indian villages aware about the importance of menstrual hygiene to prevent infections and infertility. Women have to take proper rest and proper nutrition during this menstrual period. As there are chances for getting urinary tract infections women and girl child should maintain good sanitization. NSS unit has visited ZPHS school laknepally and created awareness among school students for maintaining proper sanitization. NSS Unit also distributed sanitary Napkins to school students.
