**Name of the activity:** Development of communicative skills

**Date:** 28-11-2022

**Venue:** College Auditorium

**Number of students participated:** 60

**Resource person:** Dr.Ciddi Veersham

**Program Details**

Dr.Ciddi Veersham the retired professor from Kakatiya University has visited college to deliver a lecture on carrier opportunities in the pharmacy field. As he has an extensive knowledge on the pharmacy profession who was into this profession for more than 30 decades, his inspirational words are valuable to the many students and research scholars. Veersham sir has said to the students that communicative skills are very important to a professional graduate these days. Even a student with 90% marks in the academics with poor communicative skills is worthless. He given many tips to the students in developing communicative skills like standing in front of mirror and practicing to speak.

**Proceeding for World Blood Donor Day**

On the occasion of World Blood Donor Day on 14<sup>th</sup> June, 2022 Staff of Jayamukhi College of Pharmacy campaigned to raise awareness of the need for safe blood and blood products for transfusion. With the World Blood Donor Day slogan of “Donating blood is an act of solidarity. Join the effort and save lives” to draw attention to the roles that voluntary blood donations play in saving lives and enhancing solidarity within communities Jayamukhi College of Pharmacy highlighted the need for safe blood transfusion.

### Details of the activity

Cardiopulmonary resuscitation (CPR) is an emergency procedure consisting of chest compressions often combined with artificial ventilation, or mouth to mouth in an effort to manually preserve intact brain function until further measures are taken to restore spontaneous blood circulation and breathing in a person who is in cardiac arrest. It is recommended for those who are unresponsive with no breathing or abnormal breathing, for example, agonal respirations. CPR involves chest compressions for adults between 5 cm (2.0 in) and 6 cm (2.4 in) deep and at a rate of at least 100 to 120 per minute. The rescuer may also provide artificial ventilation by either exhaling air into the subject's mouth or nose (mouth-to-mouth resuscitation) or using a device that pushes air into the subject's lungs (mechanical ventilation).

We have conducted a CPR program on the occasion of world heart day at Mahabubabad area hospital. Doctor's Sujatha and Sajith has explained the importance of CPR. Aishwarya a Pharm D student of our college has explained the procedure of performing the CPR to the patients and made them to practice.

Details of the activity

Name of the activity: Blood grouping

Date: 23-02-2023

Venue: College Campus

Number of students participated: 20

**Program details**

Many students in the college campus are not aware of their blood groups. In case of any medical emergency knowing blood group saves life if person needs the blood or if he want to donate the blood. We have conducted a blood grouping program in the college which was very helpful for many students to know their blood group.

NARSAMPET, Dist. Warangal - 506 332, (T.S)

### Details of the activity

**Cardiopulmonary resuscitation (CPR)** is an emergency procedure consisting of chest compressions often combined with artificial ventilation, or mouth to mouth in an effort to manually preserve intact brain function until further measures are taken to restore spontaneous blood circulation and breathing in a person who is in cardiac arrest. It is recommended for those who are unresponsive with no breathing or abnormal breathing, for example, agonal respirations. CPR involves chest compressions for adults between 5 cm (2.0 in) and 6 cm (2.4 in) deep and at a rate of at least 100 to 120 per minute The rescuer may also provide artificial ventilation by either exhaling air into the subject's mouth or nose (mouth-to-mouth resuscitation) or using a device that pushes air into the subject's lungs (mechanical ventilation).

CPR alone is unlikely to restart the heart. Its main purpose is to restore the partial flow of oxygenated blood to the brain and heart. The objective is to delay tissue death and to extend the brief window of opportunity for a successful resuscitation without permanent brain damage. Administration of an electric shock to the subject's heart, termed defibrillation, is usually needed to restore a viable, or "perfusing", heart rhythm.

We in association with srimivasa heart foundation have explained these things to the students and staff members in the college by making them to practice with a mannequin.

**Details of the activity**

**Name of the activity: Power point presentation**

**Date: 15-11-2022**

**Venue: Computer lab**

**Number of students participated: 20**

**Resource person: Mr.M.Anil Kumar**

**Program details**

Power point skills are needed for all the class of students. Students have to give seminars, present their project works for which they need the skills of power point. We have given a point skill development program to the students at computer lab where they were thought how to prepare the slides how to add the animations how to use the graph bars etc
